

10th LNG Producer Consumer Conference

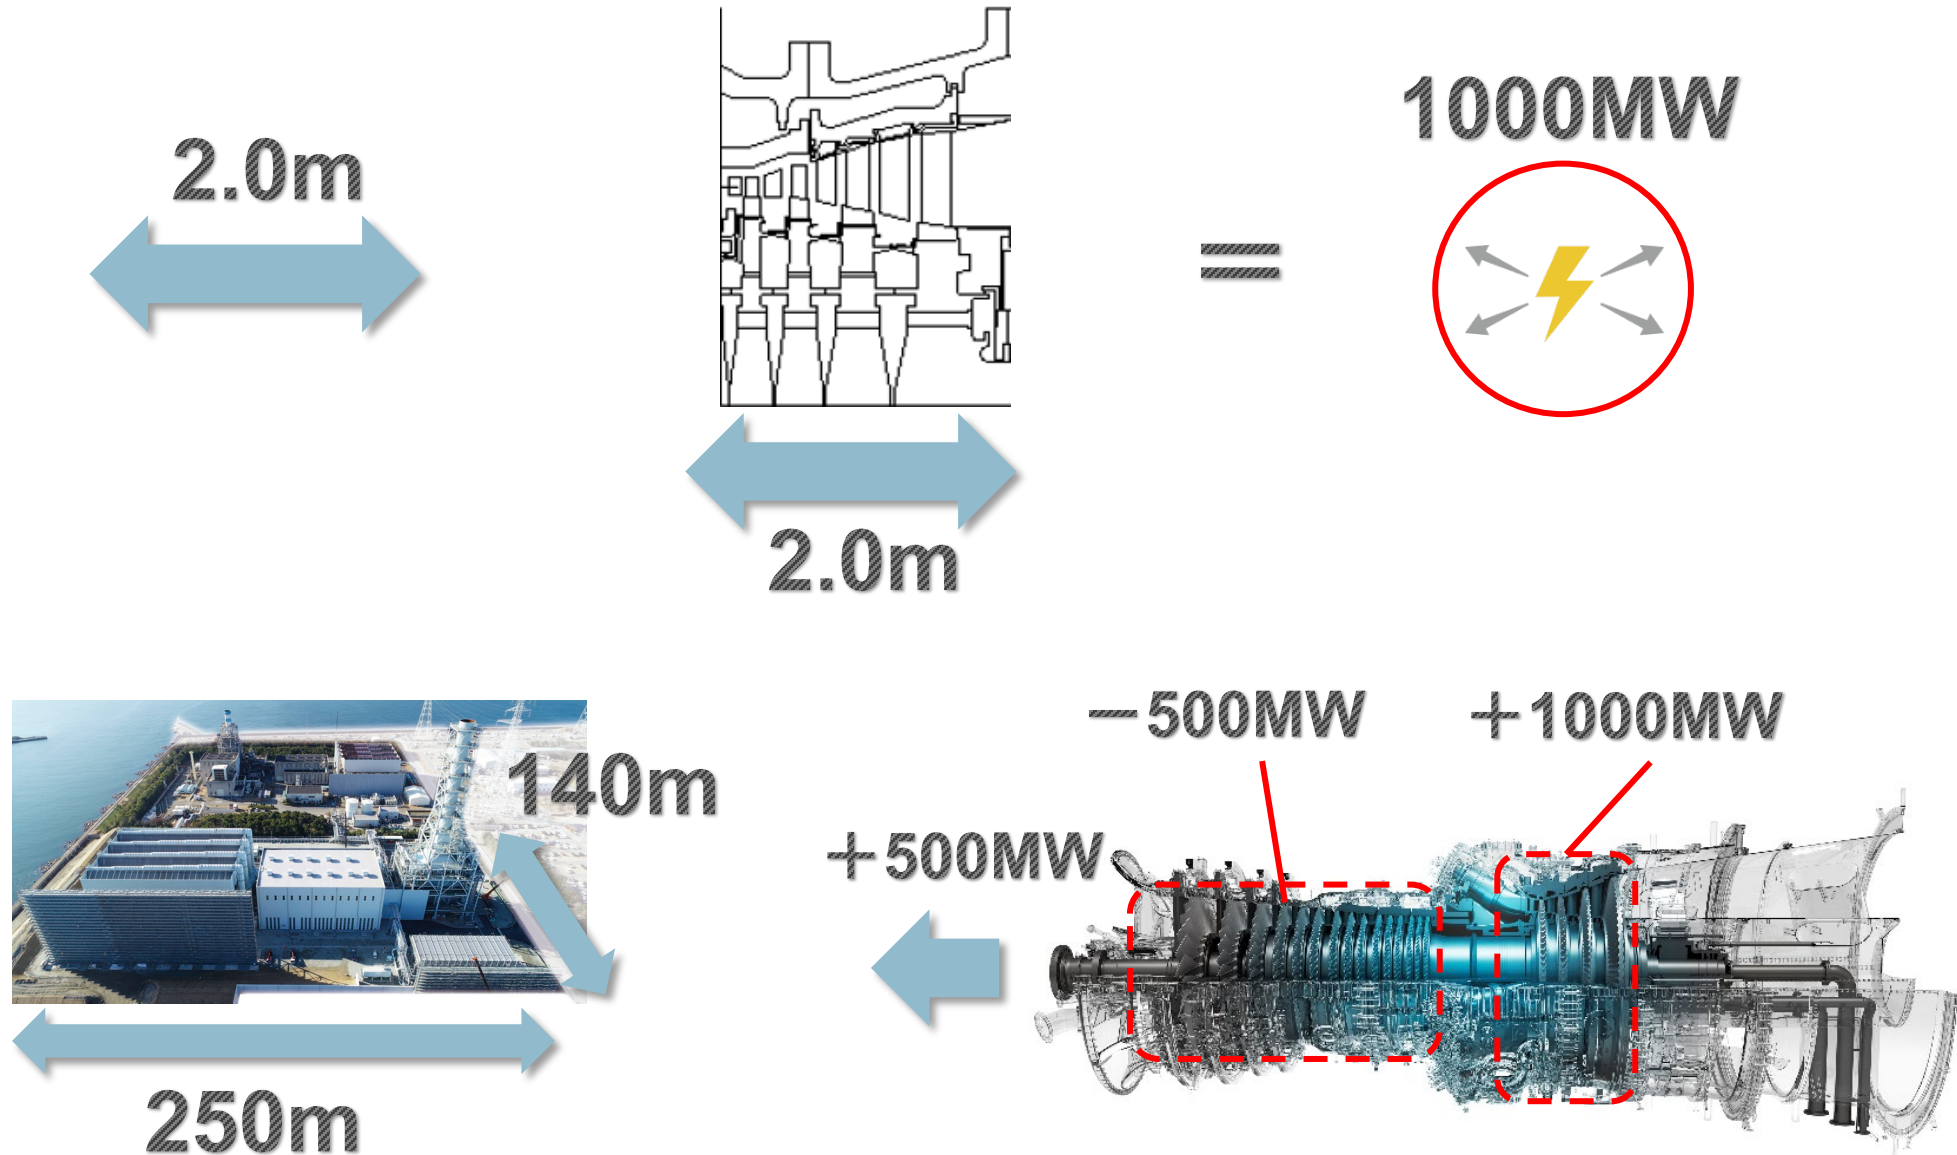

Carbon Neutral Society Realization with Dependable Infrastructure

Yasushi Fukuizumi

Executive officer & Senior Executive Fellow,
Vice President, Energy Systems

October 5, 2021

Important Fact for Gas Based Infrastructure

Build an innovative solutions ecosystem to realize a carbon neutral future

Decarbonize existing
infrastructure

Build a hydrogen
solutions ecosystem

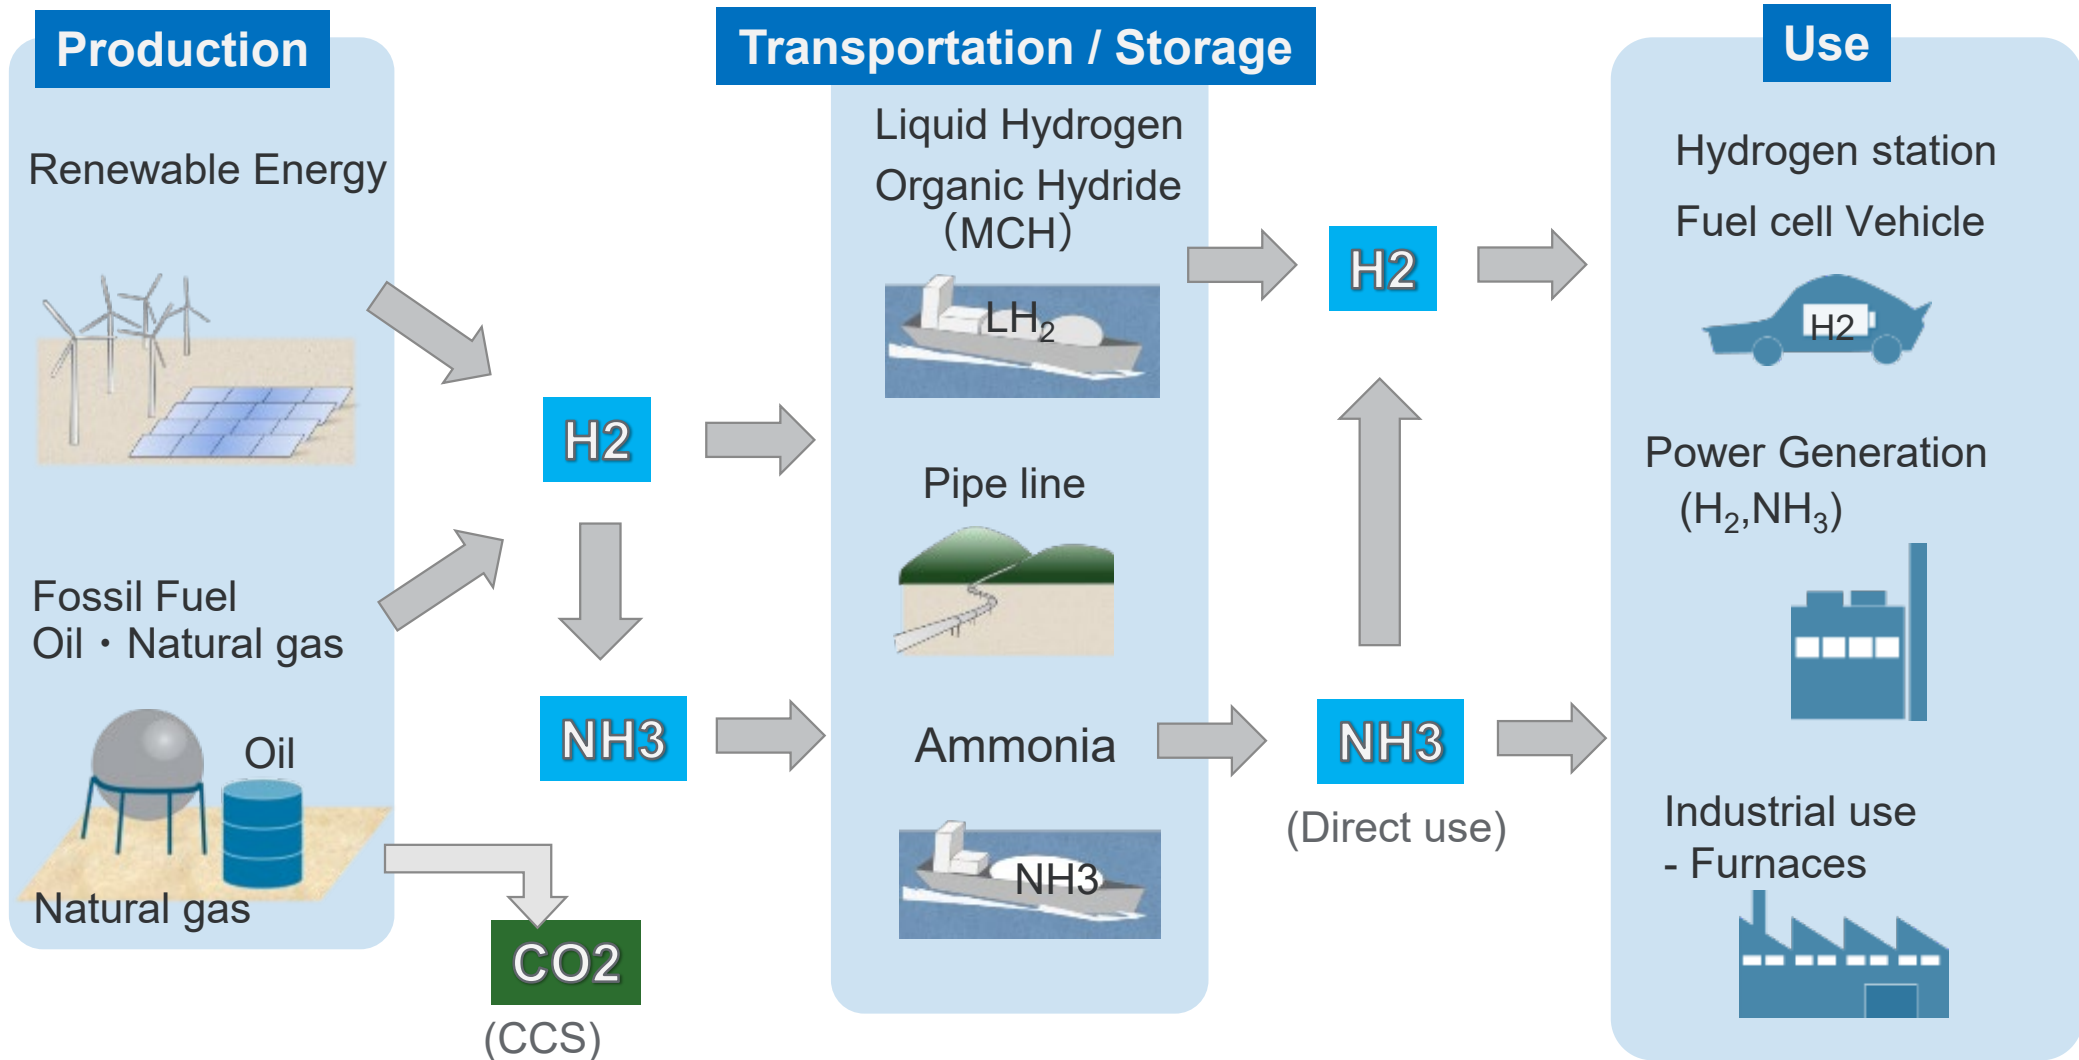

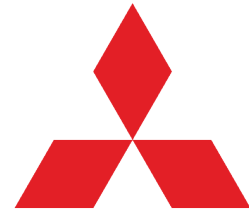

Build a CO₂
solutions ecosystem

- Energy is the basis of all the economic activities.
- Emerging countries in Southeast Asia need to have stable and affordable energy supply for their economic growth, which is finally achieving carbon neutral.
- Energy Conservation & Waste Management should be the base.
- Proper infrastructure and dependable power supply are required even with renewable expansion.
- Carbon Neutral Fuel development and CO2 Management are Totally New Energy Supply or Management Chain Creation by many business players.
- MHI will play a roll as coordinator, catalyst among players and key technology provider.
