

The 47<sup>th</sup> Meeting of APEC Energy Working Group (EWG)  
Kunming, China, 20-21 May 2014

***11.b. Peer Review on Energy Efficiency  
(PREE) and Cooperative Energy Efficiency  
Design for Sustainability (CEEDS)***

Takato OJIMI  
President, APERC

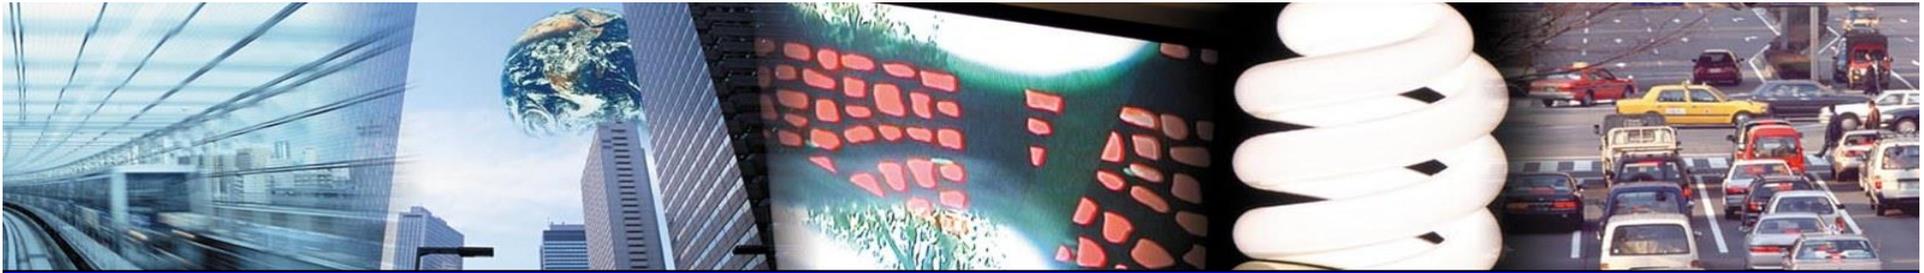

Asia-Pacific  
Economic Cooperation

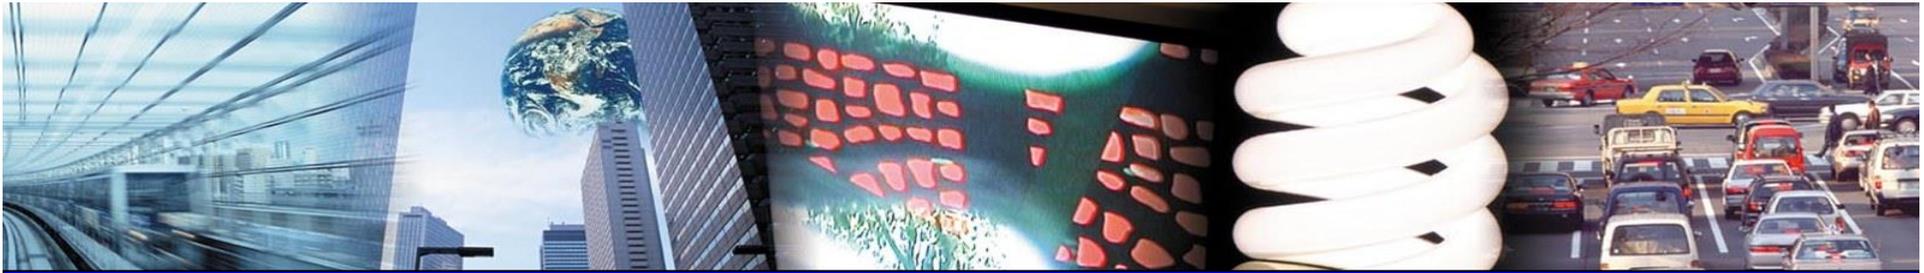

## ***11.b. (1) Objective of PREE***

- **To provide a broad review of EE goals, EE strategies, institutional setup, and policy measures in all sectors for a volunteer economy;**
- **To provide recommendations for a volunteer economy based on best/high performance practices in order to implement best practices in as many economies as possible.**

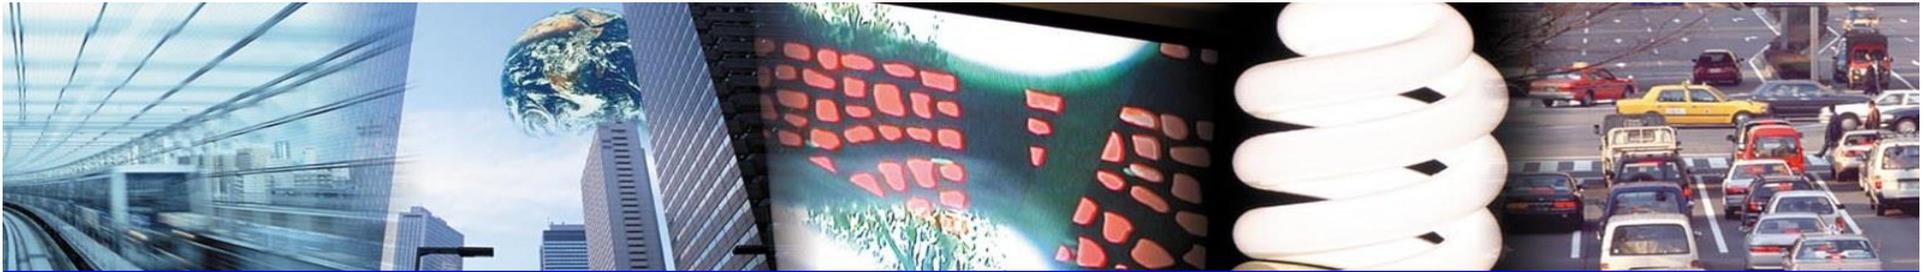

## ***11.b. (2) Follow-up PREE***

- **In 2012, the Follow-Up PREE is designed to assist former PREE host economies in implementing the original recommendations of the PREE review teams.**
- **The objective is to fill the gap between the implementation of energy efficiency action plans and the monitoring and evaluation of those plans.**

### ***11.b. (3) 2nd Follow-up PREE (The Philippines)***

- **In PREE Phase 4, though the second Follow-up PREE was originally planned in Thailand for the transportation sector, it was postponed due to domestic situations in Thailand.**
- **Instead, the Philippines is planning to host the second Follow-up PREE for its transportation sector in September 2014.**

## ***11.b. (4) future PREE***

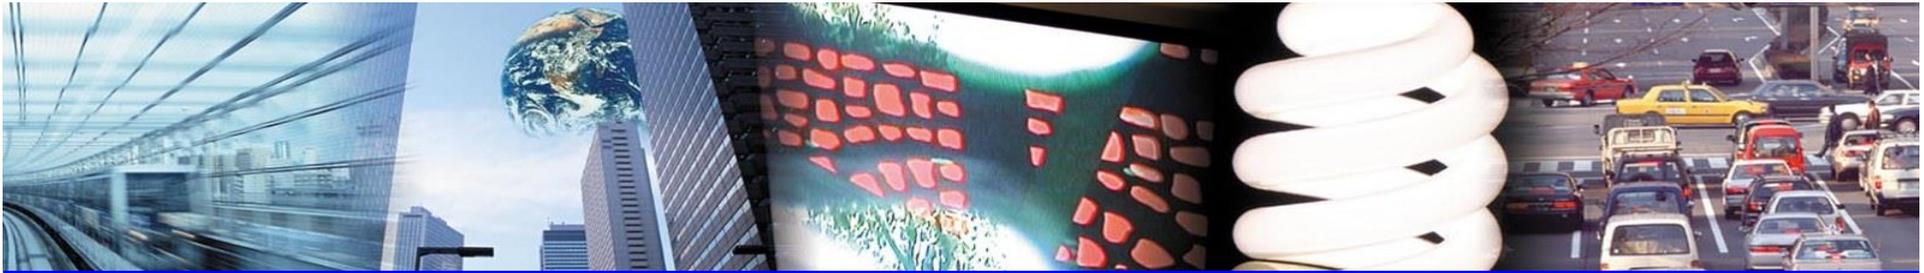

- **Given the resource constraints of APERC, APERC decided to reduce the number of peer reviews per year.**
- **One PREE **and** one Follow-up PREE (in total **two**) in 2012 and 2013**

- **One PREE **or** one Follow-up PREE (in total **one**) **after 2014****

- **However, a concept note for PREE Phase 5 was rejected at 2014 Session 1 of APEC/BMC.**

**⇒ APERC needs advice from EWG members whether APERC should continue PREE or not.**

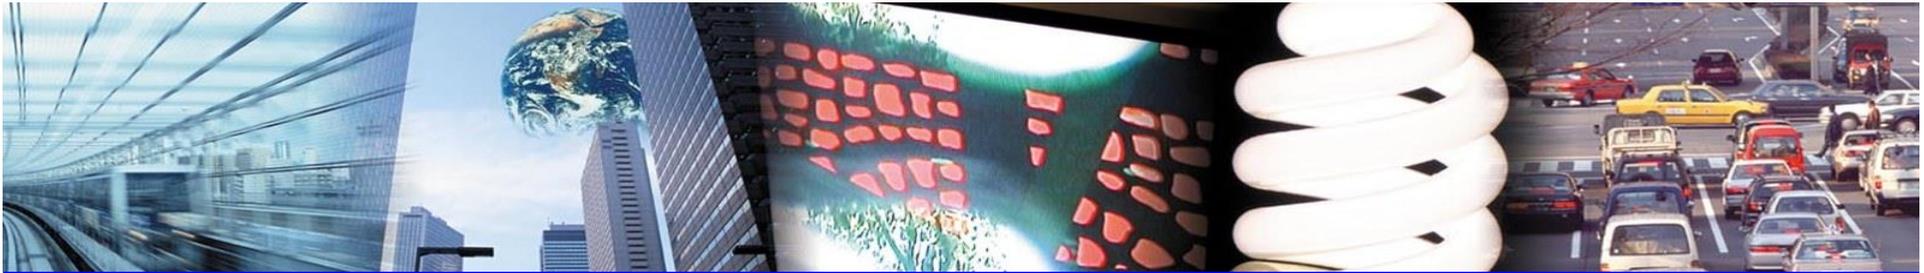

## ***11.b. (5) Objectives and Activities of CEEDS***

### **Objectives of CEEDS**

- To promote “high-performance” energy efficiency policy measures in developing economies in the APEC region.
- To assist developing economies who wish to design and implement measures for achieving energy efficiency improvements in a specified sector.

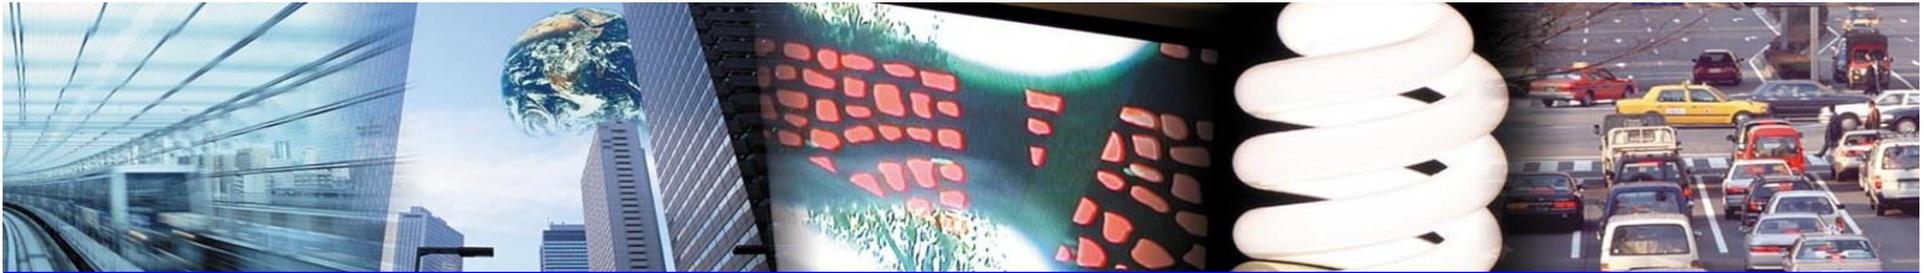

### **Activities of CEEDS:**

- Analysis / Study on energy saving potential
- A set of two workshops to study on how the best practice policy measures might be implemented in the selected sector

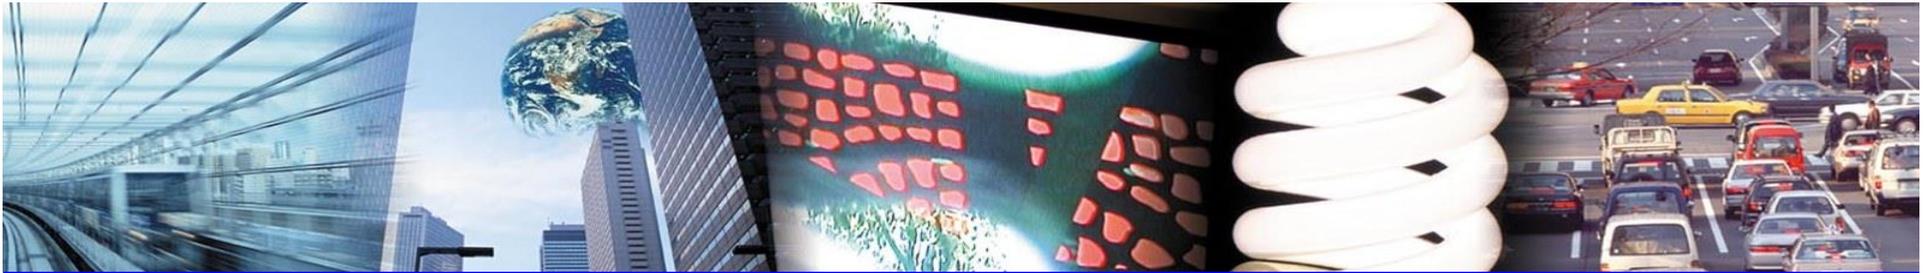

## ***11.b. (6) Replacement for CEEDS***

- **CEEDS was a very complicated project:**
  - ✓ **Two workshops in two different economies**
  - ✓ **The same participating delegates and expert speakers for both workshops in principle.**
  
- **Given the resource constraints of APERC, it was necessary to much simplify the scope of the project .**
  
- **Two workshops for several Economies, inviting same several experts twice for the both workshops**
  
- ↓
  
- **One workshop open to all Economies, inviting fewer experts once**

## ***11.b. (6) Replacement for CEEDS***

- This Workshop is
  - **To be integrated into PREE (i.e. no longer an independent project)**
  - To be renamed  
ex. “Energy Efficiency (EE) Policy Workshop”
  - To select the topics from the key issues highlighted in the previous PREEs
  - To be held in conjunction with one of the two bi-annual **meetings of EGEE&C** (Expert Group of Energy Efficiency and Conservation)

## ***11.b. (6) Replacement for CEEDS***

- **However, as the APEC budget for PREE Phase 5 including this new workshop was not approved.**
- ⇒ it is still uncertain whether APERC can launch the new workshop.
- **However, a concept note for PREE Phase 5 was rejected at 2014 Session 1 of APEC/BMC.**
- ⇒ Again, APERC needs advice from EWG members whether APERC should continue PREE or not.
